

National Registry of Emergency Medical Technicians® <small>THE NATION'S EMS CERTIFICATION™</small>	EMS Fellowship & Board Certified EMS Physician Certification Pathway		
Directive No.: 51.50	Revision: 01	Effective: October 1, 2020	Page 1 of 2

Intent

This directive outlines the initial certification pathway for Emergency Medical Services (EMS) Fellowship trained or current Board Certified EMS Physicians to obtain national certification as an EMR, EMT, AEMT, or NRP without completing a State EMS Office approved or CAAHEP accredited EMS training program.

Scope

This directive applies to physicians who provide verification of current enrollment in or completion of an approved EMS Fellowship or are currently Board Certified as an EMS Physician.

Definitions

EMS Fellowship - an ACGME-accredited program and medical subspecialty that involves prehospital emergency patient care including initial patient stabilization, treatment, and transport to hospitals in specially equipped ambulances or helicopters (ABEM, 2020).

Board Certified EMS Physician – Certified physicians who attained subspecialty certification in EMS by meeting the eligibility criteria, fulfilling specific credential requirements, and passing the EMS Certification Examination as recognized by AOBEM/ABEM (ABEM, 2020).

Directive

The National Registry recognizes that the training required for Board Certified EMS Physicians covers the depth and breadth of an initial EMS training program at the Emergency Medical Responder (EMR), Emergency Medical Technician (EMT), Advanced Emergency Medical Technician (AEMT), and Paramedic levels, and is recognized as equivalent to the recent completion of an accredited and/or state approved EMS training program, that meets or exceeds the National Emergency Medical Services Education Standards. Eligible physicians may obtain national certification at the EMR, EMT, AEMT, or NRP level upon completion of the following requirements:

- An eligible physician must provide verification of current enrollment in or completion of an approved EMS Fellowship or current Board Certification as an EMS Physician as the equivalence of EMS program course completion.
- Have a current CPR-BLS for “Healthcare Provider” or equivalent credential.
- Successful completion of the cognitive (knowledge) and psychomotor (skills) examinations, level specific.
 - Passed portions of the cognitive and psychomotor examination remain valid for 24 months, provided all other entry requirements are met.

National Registry of Emergency Medical Technicians® <small>THE NATION'S EMS CERTIFICATION™</small>	EMS Fellowship & Board Certified EMS Physician Certification Pathway		
Directive No.: 51.50	Revision: 01	Effective: October 1, 2020	Page 2 of 2

Once attained, the National Registry considers the individual certificant to be solely responsible for their national certification. National certification may be maintained through completion of the established National Registry recertification process.

Rationale

The National Registry Board of Directors passed 19-Resolution-09 EMS Fellow Eligibility for Certification, which recognizes the initial and on-going competency of EMS Fellowship trained and Board Certified EMS Physicians. The resolution directed the Executive Director to establish eligibility requirements for these physicians to obtain national certification.
